

Keeping Our Workplace Safe COVID-19 Close Contacts

VACCINATED Employees

- Fully vaccinated people with no COVID-like symptoms do not need to stay home following an exposure to someone with suspected or confirmed COVID-19.
- Self-monitor for symptoms for 14 days following an exposure.
- In addition, vaccinated contacts should get tested 3-5 days after exposure, even if they don't have symptoms.
- Wear a mask indoors in public for 14 days or until their test result is negative.

UNVACCINATED Employees

- Stay home to monitor for symptoms.
- Symptoms can develop from 2-14 days after exposure.
- Exposed individuals can reduce the length of time to stay home through the following options:
 1. Stay home through **DAY 10** if no symptoms have developed.
 2. Test on or after day 5 and stay home through **DAY 7**. Return to work after day 7 with a negative test.

In all cases, they should continue to monitor for symptoms and wear a mask when around others through **DAY 14** in order to minimize risk of spread.

POSITIVE COVID-19 TEST RESULTS

All employees who have TESTED POSITIVE FOR COVID-19 (vaccinated or unvaccinated) may return to work under the following conditions:

- At least 10 days have passed since symptoms first appeared; AND
- Improvement in symptoms; AND
- At least 24 hours fever free without the use of fever reducing medications.
